

# REVISED NOTICE

## SMOKE TESTING

### MERRY LAKE SEWER SYSTEM

**TUESDAY, JUNE 9<sup>th</sup>, 2009** the sanitary sewer collection system at MERRY LAKE will be SMOKE TESTED.

THE TOWNSHIP OF AMBOY will be conducting a SMOKE TEST ON JUNE 9<sup>TH</sup> STARTING AT **8:00 AM**.

This testing uses a WHITE SMOKE, that is forced through the sewer lines, using air pressure, to help locate any INFLOW/INFILTRATION AREAS in the sewer system caused by breaks in the lines, condition of manholes, broken clean-outs, and also it will help locate any UNLAWFUL SEWER CONNECTIONS, such as; downspouts, Weep Tiles, and Sump Pumps discharging into the sanitary sewer.

If anyone, has any medical problems, such as having to use OXYGEN, BREATHING PROBLEMS, or has need of further knowledge about this test procedure, you are to contact the Amboy Township Supervisor as soon as possible at 517.254.4477 so that arrangements may be made to assist you.

This testing of the sanitary sewer collection system will help locate sources of inflow/infiltration, and when these problem area are corrected this will reduce the amount of water in the waste water system that the community has to pump and treat, thus help reduce the costs of operation and maintenance. The Michigan Rural Water Association, at no cost to the community and its residents, is assisting the Amboy Township Sewer System and Williams and Works.

Your assistance and cooperation is greatly appreciated,

Amboy Township Board of Trustees
